EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

At paragraph 0001 of the specification, --now U.S. Patent 6,713,172,-- has been inserted after "November 2, 2001,".

The following is an examiner's statement of reasons for allowance: The main patentable features of claim 1 are providing TiCl_4 at the claimed concentrations and claimed times recited in step (v) in combination with reintroducing the AlCl_3 , HCL, CO_2 , and sulphur dopant in the claimed sequence as required in step (vi). The prior art cited herewith is the closest prior art to the claimed subject matter and although it substantially discloses formation of alpha-alumina using steps (i)-(iv) of claim 1 and alternating alumina layers with TiN layers wherein TiCl_4 is intermittently introduced, there is no teaching or suggestion to perform the features cited above. Furthermore, the concentrations and times of step (v) have been shown to be critical for the reasons set forth in applicants' specification at paragraph 0021.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
